

THE MINOM

In 2016 the XVII Conference of the International Committee for New Museology – MINOM will be held in Nazaré. The choice was made during the last MINOM conference held in La Havana (Cuba) in October of 2014. Nazaré will host the first riverside museum of Rondônia which is based on the assumptions of social museology. It's an initiative of the community with the Federal University of Rondônia and the University Extension Incentive Program - PROEXT support, that is funded by the Ministry of Education.

The proposal presented to the Conference in 2016 is based on the idea of collaboration where members of MINOM have the possibility to contribute to the riverside community, focusing on the exchange of ideas and knowledge construction, resulting in the proposition of useful and enforceable referrals to the most urgent demands.

Members registered for the conference will be divided into working groups. Discussions and meetings have as main objective the search for solutions, tips and ideas for solving the problems that are previously identified by the community. It is important to say that we have no illusions to believe that these solutions or ideas will solve the community problems, however, we know that they can generate changes and innovation in various segments.
